

2020 Training Overview

SPACE PLANNING AND AUTOMATION (APOLLO)

Symphony RetailAI is committed to creating an informed and skilled category and space management community in Australia, New Zealand and the Asia Pacific region. To support this, we offer a range of Space Planning (Apollo) training courses. We also provide the necessary details and processes that allow you to work successfully with various retailers.

Our experienced Trainers facilitate both standard classroom courses, as well as customised courses which can be delivered on the client premises. Classroom courses are set in advance and dates plus registration forms can be found on our web site.

Symphony RetailAI are committed to creating an informed and skilled space management community in the Asia Pacific Region

Space Planning (Apollo) Orientation

Two full days of Comprehensive, Hands-on training provided in a classroom setting. This course is geared for New Users of Space Planning (Apollo) Software, and people returning to the category and space management area within their business.

You will learn how to build and merchandise planograms, create reports and charts, navigate Space Planning (Apollo) with confidence, and increase productivity through a new understanding of the fundamentals of Computerised Shelf Space Management.

Prerequisites: A working knowledge of Microsoft Windows

Skill Level: Beginner - Intermediate

Location: Sydney | Auckland

Space Planning (Apollo) Accelerated Orientation

A One day, Fast-paced, Hands on training course provided in a classroom setting.

This course is geared for the more experienced User, who may have already been exposed to, or used, other space management software applications.

Prerequisites: A working knowledge of Microsoft Windows

Skill Level: Intermediate - Advanced

Location: Sydney | Auckland

2020 Training Overview

SPACE PLANNING AND AUTOMATION (APOLLO)

Space Planning (Apollo) Customised

Tailor-made training, on-site at your office, to suit your individual or group needs, whether you need a quick refresher or even more advanced training, we can customise a course according to your requirements.

We can even use your own planograms, Product Masters, and data during training exercises, as long as they are accessible on your PC where the Space Planning software is installed.

Prerequisites: A working knowledge of Microsoft Windows, and Space Planning

Skill Level: Intermediate - Advanced

Location: On-Site

Space Management Health Check

A half day on-site visit, to assess your space management setup and processes to ensure you are operating with the greatest efficiency and provide recommendations for you to optimise your systems afterwards. A few of the areas we will look at include:-

- Review Space Management goals
- Product Master check and maintenance
- Images Check
- Fixtures and planogram templates
- Importing data and import templates

Prerequisites: A working knowledge of Microsoft Windows

Skill Level: Beginner - Intermediate

Location: On-Site

Workshop: Develop Winning Category Review

Learn how to develop a 'Winning' Category Review presentation using Space Planning (Apollo). During this One Day course, your group, will learn how to:

- Understand, analyse and complete a category review from start to finish, step by step
- Identify important data and turn it into actionable insights, allowing the implementation of data driven strategies to meet your category's goals
- Use Space Planning Software to its full potential enabling you to deliver winning results more often
- Map out, then create an unequalled presentation that will sell your category plans to the retailer based on overall category increases

Prerequisites: Minimum four attendees

Skill Level: All

Location: On-Site
